

DIMO'S TOOL & DIE / LABTRONICS®

Manufacturer of the **MODEL 919™** **MOISTURE** **TESTER**

ATTENTION PRODUCERS

As **MANUFACTURER** of the **MODEL 919™** in North America, we feel it necessary to inform users of the following:

- Dimo's/Labtronics® has over 55 years of production and service experience with our Model 919™.
- Our Model 919™ is the most accurate and precise moisture tester on the market.
- All Model 919™ testers built by Dimo's will **ALWAYS** have the **TIME TESTED** analogue meter movement and **ORIGINAL** electronics.

A WORD ABOUT DIGITAL ALTERATIONS:

- Our Model 919™ has **NOT** gone digital and **NEVER** will. There is **NO** advantage to any digital alteration.
- We have **NO** affiliation and supply **NO** parts to companies attempting to alter our Model 919™.
- Attempts to alter our Model 919™ to digital will **NOT** improve accuracy. Claims to this effect are **FALSE** and misleading.
- Modifications have been made to ensure that digital alterations **CANNOT** be installed into our Model 919™ testers.

Visit www.labtronics.ca to read about digital alteration **PROBLEMS & CONCERNS.**

A WORD ABOUT CALIBRATIONS:

- A professionally calibrated Model 919™ is done so using a minimum of 3 dial drum reference points.
- Comparison to a single ref. pt. (as in a dig. altered meter) does **NOT** ensure your 919™ tester is properly calibrated across the entire calibration range (from 0-100 on the dial drum).
- Comparison to a single dial drum ref. pt. (as with a dig. altered meter) is **NOT** enough and could lead to a **FALSE** sense of proper calibration.

EXCITING NEW FEATURE: The LED Indicator Light

Now available — LED indicator light changes color when the needle reaches low point. Analogue meter remains in tester & LED light installed. Provides **TWO** separate ways to determine Null Point & Dial Drum reading.

EXPERTS IN GRAIN MOISTURE TESTING

12 Bangor Ave., Winnipeg, MB R3E 3G4
